

Glass Connectables

If you are planning an eye-catching feature wall, fireplace surround or backsplash, Edgewater Studio's Glass Connectables series will truly deliver the "Wow" response.

Matte and glossy glass are combined to achieve interesting textures. And while each color offering is beautiful on its own, two or three colors can also be blended to create a unique look to every installation.

Glass Connectables can also be purchased as a Bordered Feature or a standard glass field tile, available in matching colors.
